GENERATION FUTURE

Taking care of all your family's needs now and for the future

Hoover is still the name you can trust for quality products that are modern, reliable, practical and easy to use. Our washing machines, washer dryers, tumble dryers, dishwashers & refrigeration have all been designed with the very latest technology to help make your busy life easier. We've drawn on our vast experience to add a whole new range of intelligent and technologically advanced features that meet actual practical needs, not just for today but for the future.

Hoover's continuous development programme has resulted in appliances that use less electricity and less water, thereby reducing their carbon footprint and safeguarding the environment for future generations.

HOOVER.

THE ICONIC ORIGINAL.

A lot has happened in the last 100 years and life today is very different to how it was when we created the world's first upright vacuum cleaner.

In fact, the increasing demands of busier, more complex lives has meant that change is something we've had to not just get used to but to anticipate and make the most of.

The original 1908 cleaner has been joined by generation upon generation of new products and innovations all designed to meet the continuing needs of people, their homes and, latterly, the planet. So as we look forward to our next hundred years and the needs of future generations, we're pretty sure that change will be one of the few unchanging things.

This is why Hoover created 'Generation Future'. A lasting stamp of assurance that we're dedicated to creating and providing today what customers will demand as the standard of tomorrow. From floorcare to kitchen appliances, we're constantly thinking ahead to ensure we're able to meet the needs of our many and varied customers with clever, affordable products that are simple and easy to use.

HOOVER.

CARING FOR FUTURE GENERATIONS.

Together, we share the responsibility to safeguard our environment for future generations.

At Hoover, that means continually developing new, intelligent technologies to produce electrical appliances that perform more efficiently and use less electricity and less water. This significantly reduces the carbon footprint from your appliance.

Hoover A+++ 9kg and 10kg energy efficient washing machines are part of the Hoover Green Ray project which supports Carbon Footprint with a scheme to 'plant for the planet'. For every one of these machines produced we contribute to a fund to help support the plantation of trees in Kenya which in turn provides education on sustainable land management and provides work for local communities.

In fact our ongoing commitment will ensure that we will continue to develop more intelligent, more efficient appliances for future generations.

Global Warming and Your Carbon Footprint

To supply us with the energy we need to heat and light our homes, run our appliances and power our cars we are burning an ever-increasing amount of fossil fuels such as coal, gas and oil. This process creates Carbon Dioxide, which is leading to global climate change.

Carbon Dioxide is a naturally occurring gas crucial to life, but also the main 'greenhouse gas' contributing to Global Warming. Its build up causes rising temperatures, and will have a profound effect on wildlife and people worldwide.

Households produce 25% of our national Carbon Dioxide emissions. This is becoming a concern for many individuals, who are all seeking ways to reduce the number of carbon emissions they personally produce through their energy consumption. A growing number of people are starting to use the Carbon Footprint Calculator to calculate the amount of carbon emissions they create from their current energy consumption. This can be found at www.carbonfootprint.com

Changing your household appliances to energy efficient products can help reduce your personal carbon footprint. At Hoover we have made several advancements in the last ten years to improve the energy efficiency of our entire white goods range, including Dynamic Washing Machines, Dynamic Dishwashers and Hoover Dynamic Fridge Freezers.

"Carbon Footprint is a measure of the impact human activities have on the environment in terms of the amount of greenhouse gases produced, measured in units of carbon dioxide. Hoover has made considerable improvements to its entire range of white goods over the last ten years, significantly reducing the carbon emissions of their appliances through maximising loading capacity and reducing electricity and water consumption" John Buckley, Carbon Footprint™.

For further information on how to reduce your personal carbon footprint or making your appliance carbon neutral, visit www.carbonfootprint.com

Energy Savings Trust

The Energy Savings Trust (EST) recommends all of Hoover's energy efficient products on its website www.energysavingtrust.org.uk and even gives handy tips on how to use your appliances more efficiently:

Using a 40°C wash cycle rather than 60°C means you use a third less electricity. Reduce the wash to a 30°C cycle and the amount of electricity saved (not to mention money) will be even higher. Modern washing powders and detergents work just as effectively at lower temperatures so unless you have very dirty washing, bear this in mind.

If everyone in the UK upgraded their old cold appliances to an energy saving recommended product, energy wastage would be cut by over two-thirds. Enough CO2 would be saved to fill 24 million double-decker buses and the electricity saved would be equivalent to the annual output of three 700MW power stations.

WEEE Recycle Your Old Appliance

Electrical and electronic equipment (EEE) plays an ever-increasing role in our daily lives. Our kitchen appliances, mobile phones and computers offer us many benefits during their working lives but when this equipment is thrown away it affects the environment. Waste electrical and electronic equipment (WEEE) is one of the fastest growing waste streams in the UK and the EU.

The WEEE Directive aims to minimise the amount WEEE householders throw out with their general rubbish. By keeping WEEE separate from other waste it can be treated, the hazardous substances can be removed and a large amount of waste can be recycled rather than sent to a landfill.

Time to Change

The Time to Change website aims to demonstrate the significant benefits of replacing outdated domestic appliances with new energy efficient models; providing information on individual household savings, within the broader context of the national environmental impact.

Visit: www.t2c.org.uk for further information

DYNAMIC 10+ STEAM

More load capacity

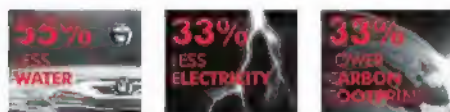

Families today lead busier lives than ever and demand harder working washing machines. And no machines work harder than the new Hoover **Dynamic 10**. It can handle any size wash up to a 10kg load, so you spend less time washing and more time getting on with life. What's more, the supersized drum amazingly fits within an 85x60x64.5cm dimension cabinet - now that's really intelligent.

BOASTS EVEN MORE INTELLIGENT USE OF SPACE

More efficient

The Dynamic 10 achieves an outstanding 'A+++' energy efficiency rating, reducing your energy and water consumption without compromising wash performance. What's more, the consumption of energy and water is adjusted to reflect the load quantity, thus avoiding wastage.

*Savings based on 10 year old Hoover washing machine consumption and equivalent kg of clothes per year.

More performance

The top-of-the-range Dynamic 10+ Steam incorporates a sophisticated Steam Wash function for added care of your laundry.

Steam technology has a number of added benefits compared to traditional washing, including a 20 minute refresh cycle to eliminate odours from clothes and a short steam cycle to relax fabrics and enable easier ironing.

The intensive steam wash function achieves a 60°C wash performance while using cool wash temperatures of less than 40°C!

The Hygiene+ cycle also eliminates 99.9% of bacteria in your wash load too.

More intelligence

The intelligent **KG Mode** sensor weighs the laundry and adjusts the cycle time, water and electricity consumption to suit the size of the load. This gives you the optimum consumption even if you are only washing one shirt.

The **Rapid 14 cycle** is perfect when you only have a few items to wash, completing a full wash, rinse and spin in only 14 minutes!

The Dynamic 10 range promises the quietest Hoover wash ever thanks to our inverter wash technology, an advanced brushless motor that is far quieter than conventional motors.

More control

The **easy to use In Touch** controls put you in total control of your wash cycle, whether it's adjusting the wash length using Time Manager Display, or altering a programme's temperature and spin speed. **In Touch** controls also give you a minute-by-minute countdown during the cycle and allows up to 23 hours delay start.

The Dynamic 10+ Steam goes one step further by incorporating an LCD display, with a host of informative wash options on the display.

More technology

The drum also features our unique **3D Dynamic Wash System** that delivers the ultimate 'A' rated wash performance for a large load. It achieves this through a combination of three special features:

More laundry

The Hoover Dynamic 10 boasts our largest ever capacity in a standard sized machine, so it may surprise you just how much laundry you can fit in.

Latest technology to make your life easier

At Hoover we don't develop technology simply for technology's sake. It has to perform a practical job and help make our washing machines intelligent, reliable, uncomplicated and easy to use. That's why the Dynamic and Optima ranges are packed full of convenient features.

More intelligence

Incorporated into all Dynamic and Optima front loading washing machines and washer dryers, the **Intelligent Wash System** has sophisticated electronic software that acts as an **Intelligent Sensor** to constantly monitor and adjust the wash process, resulting in optimum performance throughout the cycle. The system ensures that:

- a constant temperature is maintained for better cleaning
- the spin process removes more water for quicker drying
- the drum revolves at exactly the right speed for better distribution
- the water level matches the type of fabric and size of load
- detergent is directed to the heart of the wash for better utilisation and less waste

More care

The **Sensitive Care** option offers a deeper than normal wash level to provide gentler washing for especially delicate fabrics, while detergent is removed thoroughly with five extra rinses. Perfect for people with delicate skin, this option can be selected with all cotton and synthetic cycles.

The **Stain Blaster** option, available on all cotton cycles, tackles stubborn stains by maintaining wash temperatures throughout the programme and adjusting the spin speed of the drum during critical stages of the wash and rinse cycles.

Now Hoover give you even more care with four cycles for special materials:

- Providing a longer wash at a low temperature, the **Sports Cycle** is designed to deal with more expensive fabrics that require gentleness but are also liable to be dirty or stained following rigorous exercise
- **Duvet Cycle** has been specially designed to wash bulky items which require more water and a specific drum spinning action to wash items effectively
- **Woolens Cycle** is dedicated to garments carrying the Woolmark symbol
- **Silk Cycle**, at a low 30°C and with no final spin, is ideal for 'hand wash only' items

More control & convenience

Available on Dynamic machines, the advanced **Time Manager Display** enables you to choose three options of wash time (short, medium or long) on selected programmes. It also gives you a **Countdown Display** with an at-a-glance indication of the time remaining on any wash cycle so you can manage your time more effectively, while with **Delay Start** you can delay the start of a wash either to take advantage of off-peak electricity or so the cycle ends as you arrive home.

Temperature Select and **Spin Select** controls allow you to choose lower temperatures and spin speeds on selected programmes. For reduced creasing and easier ironing, selected Dynamic and Optima models also have a new **Fast Iron** option that holds clothes in water after the final rinse until you are ready to select the final spin.

More time for you

To save time if you're in a hurry selected machines feature:

- **14 Minute Wash** - Ideal when you only have a few items to wash in a hurry.
- **Daily 29 and 44 minute programmes at 40°C** - two very clever quick washes for smaller and larger loads respectively at the most popular wash temperature.
- **59 minute 'A' wash** - an unbeatable 'A' rated wash performance in under an hour.

The largest choice of big capacities

Dynamic **9^{kg}** & **8^{kg}**

The Dynamic Range can effortlessly handle an impressive 9kg wash – that's 80% more capacity than traditional 5kg washers

Big wash, but compact size: the Dynamic 8 manages an impressive 8kg wash (60% more capacity) now fits into a smaller 85x60x54cm space, giving you more space for the plumbed in pipework behind the washer

Optima **7^{kg}** & **6^{kg}**

The new Optima 7kg and 6kg washing machine range features a unique teardrop door design and innovative features which ensure design and functionality are effortlessly entwined for maximum performance

Fast Spin Speeds

Fast spin speeds extract more water and hence reduce drying times. That's why Hoover washers make life easier by offering speeds from a fast 1200rpm to a really fast 1600rpm

Triple A Rated*

Dynamic and Optima washing machines are A+AA rated*, offering the ultimate in energy efficiency, wash and spin performance

*Except 1200rpm spin speed models which are A+AB rated

Higher, Wider Porthole

Dynamic and Optima washers have an extra large 350mm porthole positioned much higher in the cabinet than traditional washing machines. This not only looks more striking but also makes loading and unloading much easier, especially for bulky items

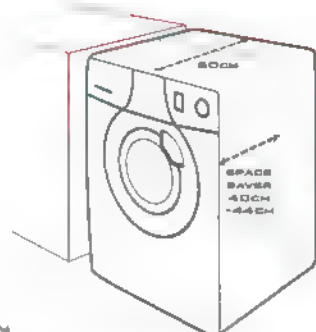

NEW SPACE SAVER LAUNDRY RANGE

MACHINE

SPACE SAVER
WASHER DRYER
44 CM DEPTH

**BIG ON THE INSIDE,
SMALL ON THE
OUTSIDE**

Space Saving

The range of Optima Space Saver washing machines and washer dryers benefit from Hoover's Advanced Drum Technology which facilitates a narrower depth design than a standard machine. Easily accommodating up to a 7kg wash load, they are the perfect choice for small kitchens and utility rooms where space may be limited.

More Flexibility

The Hoover range of Space Saver washing machines and washer dryers can be located in even the most awkward places, with washers at just 40cm deep and washer dryers at just 44cm they can fit into places that other appliances can't.

More Capacity

Space Saver washing machines are small on the outside but big on the inside – the Optima OPHS712DF has 40% more capacity at 7kg than a traditional 5kg machine. The WDYNS654D can wash 6kg and dry 5kg and at 44cm deep is the slimmest appliance on the market.

More Efficient

All Optima washing machines are A+ rated for energy efficiency.

Bigger Capacity Washer Dryers

Dynamic **9^{kg}** WASH + **6^{kg}** DRY

The Dynamic 9kg washer dryer offers a massive 9kg wash load and a 6kg dry load for an even more practical large capacity laundry solution.

All Hoover washer dryers incorporate three levels of Auto Sensor Drying that protect your clothes and save electricity by taking the guesswork out of setting the drying time. You simply select the degree of dryness you require and the dryer switches off automatically when it is reached.

More control

3 levels of Automatic Sensor Drying.

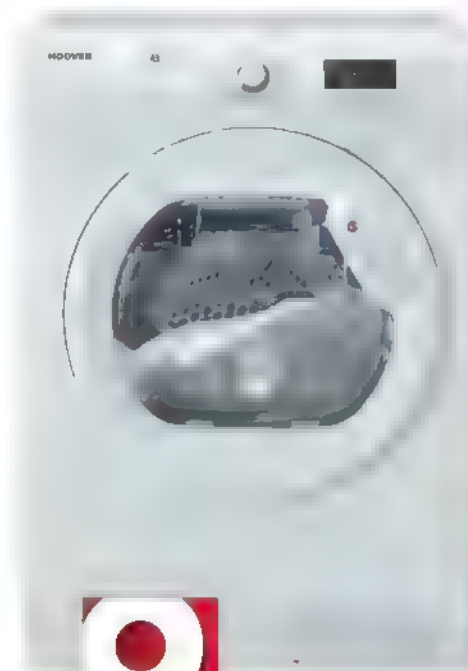

Also available:

Dynamic **8^{kg}** + **5^{kg}**

Vision **6^{kg}** + **5^{kg}**

AquaVision Tumble Dryers

Dynamic **9^{kg}** DRY + **8^{kg}** DRY

With the latest technology and stylish design, the Hoover Dynamic condenser tumble dryer range gives you an extra large 9kg and 8kg capacity. Steam is condensed into water and stored in the large AquaVision container for emptying.

More control

Advanced programmes for real needs

More efficient

The excellent 'B' energy performance of the Dynamic sensor dryers saves electricity and carbon emissions.

Also available:

VisionHD **9^{kg}**

VisionHD **8^{kg}**

NEW HOOVER DYNAMIC TUMBLE DRYERS

More Accessible

The sometimes awkward to carry water condenser drawer has now been replaced by a new patented AquaVision water reservoir that has been cleverly integrated into the door of the tumble dryer.

More Convenient

An easy grip handle makes the AquaVision reservoir unit easy to remove for emptying. It's also self balancing so avoids spillages.

More Efficient

AquaVision provides a clear at-a-glance view of the water level so that you will always know when it needs emptying, no more mid cycle interruptions because the reservoir drawer is full. The condensed water is limescale free so the unit maintains its transparency even after frequent use.

More Environmentally Friendly

Water conservation is important for the environment and savings can also help family finances. The AquaVision reservoir is capable of collecting up to 5 litres of water which equates to 800 litres per year and is equivalent to 10 or more showers or 17 more washloads.

Ergonomically designed, AquaVision has a convenient handle making it easy to remove for emptying and it can be carried as easily as a small bag.

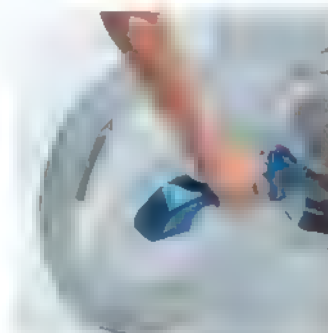

Easily accessible

Ergonomic handle

Convenient to use

Simple to replace

Compact design
A clever visual reminder
Convenient to use

**AQUA
VISION**

The collected condensed water is limescale free so it can be used for lots of jobs around the home including ironing and washing floors.

NEW DYNAMIC DISHWASHER 3D

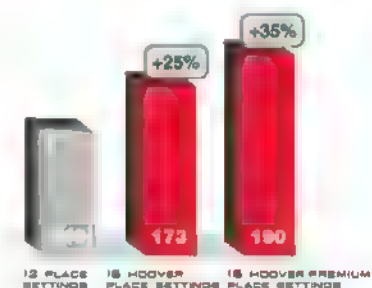

More Flexibility

The Hoover 3D dishwasher features a combination of 3 baskets and 15 place settings and provides additional valuable loading space in the top basket.

The extra upper basket is perfect for small coffee cups, saucers, side plates and cooking utensils leaving the other two baskets free for larger plates, cups, glasses, pots and pans.

More Capacity

The third basket increases the loading capacity by 10% compared to a standard 15 place setting dishwasher and by 35% compared to a 12 place setting dishwasher.

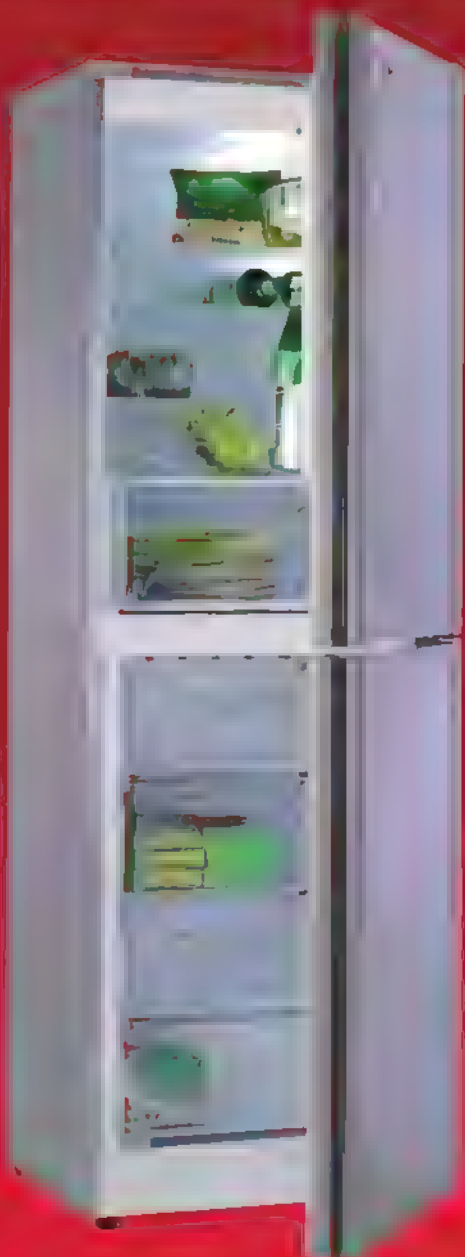

More Efficient

The most spacious, efficient dishwasher on the market.
Optimum wash performance with minimal consumption:

A+ ENERGY CONSUMPTION
-10% ENERGY CONSUMPTION COMPARED TO A CLASS PRODUCTS

UNIQUE HOOVER DYNAMIC REFRIGERATION

INTELLIGENT, INNOVATIVE, STYLISH

More style

With designer rounded handles, full length full length glass doors, the Hoover Dynamic has a stylish, streamlined appearance and at 45% deeper than ever before, the 6cm deep door provides improved ventilation, quieter operation and prolonged food preservation times.

More flexibility

Hoover Dynamic has 6 storage compartments, 10 drawers and 10 compartments of space. Door storage is adjustable allowing space to be created for large or bulky items, while the deep fresh shelves, drawers and baskets provide the perfect storage conditions for fresh fish and meat.

More convenient

Excellent Choice of Frost Free Fridge Freezers

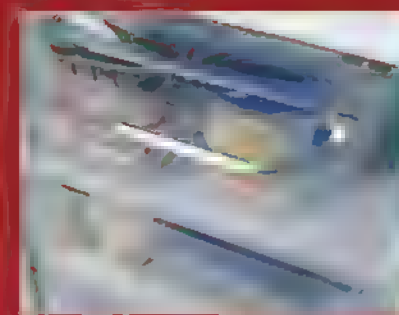

54cm

60cm

Today the need to store fresh and frozen food at the optimum conditions is more important than ever. At Hoover, we've put our experience to work and developed a range of refrigeration products that combine stylish design with innovative features that aim to give you maximum flexibility and make your life a whole lot easier.

Emergency Storage Drawer

Glass Shelves

WASHING MACHINES

Hoover has a range of washing machines to suit the needs of all families, whether they are large or small. Each range has a selection of advanced features and utilises the latest technologies to give you the perfect solution for your home laundry requirements.

10kg Load

Double the capacity of a traditional 5kg washer, the Dynamic 10 can handle any size wash up to an enormous 10kg load.

Available in two options, the Dynamic 10 D has a modern incorporation of advanced steam wash functions and added features, whereas the Dynamic 10 M model has a traditional wash function for the convenience of capacity.

9kg Load

80% more capacity than traditional 5kg washers, it meets the increasingly demanding laundry needs of busy families, the Dynamic 9 with its mega 9kg load enables you to do more washing in fewer loads, thereby freeing up your valuable time. Plus there's no need to rethink your kitchen layout as the machine fits in a standard space without protruding. Intelligent use of space from Hoover.

8kg Load

The Dynamic 8 comes in a compact 8kg model, which is 10% more space than traditional 5kg washing machines, but has the capacity to handle 8kg of laundry.

7kg Load

The latest Hoover Dynamic 7g washer comes with the latest in Hoover design and technology, featuring a 7kg load capacity and a 3D dynamic wash system effortlessly entwined for maximum performance.

6kg Load

Hoover's 6kg range has been designed to be the perfect solution for your home laundry requirements.

3D Dynamic Wash System

Unusually redesigned Dynamic and Optima drums use increased water pressure, curved paddles and a raised dome system to move the laundry in a 3-dimensional way, providing the innovative dynamic that ensures clothes are moved in the optimum performance. (The new range also includes the HydroDome.)

HydroDome

The latest HydroDome profile is used to create a dome shape that traps the clothes from clinging to the sides of the drum during the wash cycle. This helps to move the laundry in a 3-dimensional way during the wash cycle for more effective wash action and reduced wearing of the clothes. The new shape of the HydroDome profile also increases the water extraction performance throughout the wash cycle.

HydroPressure

Smaller and more numerous holes in the new drum achieve a higher water pressure for an all round better cleaning performance, and also enable improved water extraction during the spin cycle.

KG Mode

Hoover's new Dynamic 10 D and Optima 10 D have a KG mode for extra large loads.

Intelligent Wash System

Hoover's new Dynamic 7g and Optima 7g have an Intelligent Wash System that automatically adjusts the wash cycle to suit the load. The system uses a combination of sensors to detect the load size and the type of fabric, and then adjusts the wash cycle accordingly. This ensures that the clothes are washed at the correct temperature and for the correct length of time, resulting in better cleaning performance and less wear on the clothes. The Intelligent Wash System also includes a water level sensor that adjusts the water level to suit the load, ensuring that the clothes are always fully submerged. This system is a great way to save energy and water, while still getting the best results from your washing machine.

WAITING WAITING

Intelligent Sensor

The sophisticated electronic software incorporated in the intelligent Wash System adjusts the water level and programme length throughout the cycle according to how much laundry you load into the machine, as well as the nature of the fabric in each wash.

Steam

Steam technology has a number of added benefits compared to traditional washing, including a 20-minute refresh cycle to eliminate odours from clothes and a short steam cycle to relax fabrics to enable easier ironing.

The Invenio Steam Refresh cycle, which achieves a 100% steam penetration, is designed with temperatures of less than 40°C.

LCD Display

The advanced LCD display features Dynamic Wash, which allows you to manage all elements of your wash in clear, easy-to-use icons.

Time Manager Display

Dynamic machines have an advanced Time Manager Display, that allows you to select the length of selected wash programmes (short, medium and long cycle), giving you a minute-by-minute countdown during the programme, allowing you to hours delay start.

Countdown Display

Available on several washing machines, the Invenio Countdown Display gives you a glance indication of the time remaining on any wash cycle, so you can manage your time more effectively.

Delay Start

This option allows you to delay the start of the wash, providing you with the time you need for when the cycle finishes rather than leave the clothes damp inside the machine. It also enables you to take advantage of cheaper rates at night.

Temperature Select

With many programmes, you can select a different temperature. With the Temperature Select, a variable temperature control allows you to do further.

Spin Select

Selected from the controls, the Invenio Spin Select allows you to choose the spin speed depending on your washing needs.

Higher, Wider Porthole

Dynamic and Optima washers have up to a large 50mm porthole positioned higher in the cabinet than traditional washing machines. This not only looks more professional but also makes loading and unloading much easier.

A+++ Energy

All selected Dynamic machines are guaranteed A+++ energy efficiency, a 30% saving compared to A energy rated appliances.

For more information, visit www.bosch.co.uk

Sensitive Care

The Sensitive Care programme is designed to protect delicate fabrics, ensuring they are washed at a low temperature and with a gentle spin cycle. It also includes a 10-minute refresh cycle to eliminate odours from clothes.

Stain Blaster

The Stain Blaster spins, re-washes and rinses again, before moving on to maintaining wash temperatures throughout the programme and adjusting the water level if the machine detects a high level of detergent.

Fast Iron

Available for selected programmes, the Fast Iron programme is designed to find the stage when you are ready to select the final spin speed to complete the cycle. It's not recommended for delicate or dry-clean only fabrics.

Hygiene+ Cycle

The Hygiene+ cycle includes a 10°C extra boost to the pre-wash stage and a boost to the Steam wash function.

14min Rapid Wash

Ideal for washing a few items in a hurry!

Daily 29min and 44min at 40°C

For everyday washing, the 29min and 44min programmes are designed to

59min 'A' Wash

'A' rated wash performance in under an hour!

'AA' at 40°C

The 'AA' programme is designed to provide the best of both worlds – a high wash temperature and a shorter cycle time.

Sports Cycle

The Sports Cycle is ideal for washing your sports kit, including football kit, and is designed to wash cycles at 40°C and 60°C. It includes a pre-wash stage, followed by a main wash stage, a rinse stage and a final spin.

Woollens Cycle

The Woollens Cycle is designed to wash your woollen clothes, including

Silk Cycle

The Silk Cycle is designed to wash your silk clothes, including silk dresses, and no final spin.

Duvet Cycle

The Duvet Cycle is designed to wash your duvets, including duvets, and uses a special spinning action to wash items effectively.

Inverter Wash Technology

The Inverter Wash Technology is designed to wash your clothes, including clothes, and is designed to be far quieter than conventional motors.

* Features are available on selected products. See product specification for full details.

LAUNDRY CENTRE

Dynamic & VisionHD Washer Dryers

The Dynamic range of advanced, easy-to-use washer dryers combines all the features of a Hoover washing machine with the convenience of a dryer and offers a choice of practical drying and specialty laundry solutions.

The Dynamic range comprises massive 9kg load and dry capacities (e.g. the Dynamic 9 also offers an 8kg wash load and drying capacity of 5kg) and offers a choice of main washes (6kg load and dry 5kg).

It also offers optional 1400 or 1600rpm plus an advanced feature: the Intelligent Wash System, including the Intelligent Wash System, which automatically adjusts the wash temperature to suit the fabric and the level of soil.

Auto Sensor Drying

The Dynamic range of washer dryers features an advanced Auto Sensor Drying system. This system automatically adjusts the drying time to suit the load and the level of soil, ensuring that your laundry is dried to the perfect level of dryness. The system also includes a 'Wash & Dry' button, which allows you to wash and dry your laundry in a single cycle. The system also includes a 'Wash & Dry' button, which allows you to wash and dry your laundry in a single cycle.

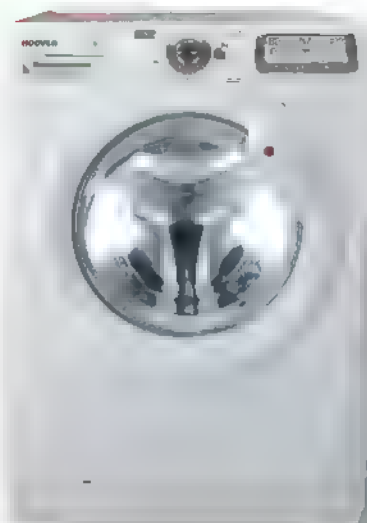

Energy Efficient

The Dynamic range of washer dryers is designed to be energy efficient. The system includes a 'Wash & Dry' button, which allows you to wash and dry your laundry in a single cycle. The system also includes a 'Wash & Dry' button, which allows you to wash and dry your laundry in a single cycle.

HYPERMIX TUMBLE DRYER

The Dynamic Tumble Dryer has a 9kg capacity and is a compact and space-saving machine. It features the new AquaVision sensor and 12 drying programmes: Relax 110, Dry Shirts and a Rapid 40 programme for great fabric care.

AquaVision

The traditional outward-facing water sensor has now been replaced by a new patented AquaVision water sensor that has been cleverly integrated into the door of the tumble dryer. Ergonomically designed, the AquaVision has a convenient handle making it easy to remove for maintenance. It can be stored as easily as a small bag.

Relax Programme

A cool 60 degree 40 degree cycle, perfect for drying delicate fabrics and preventing wrinkling. It has a 110 degree cycle for drying towels and other heavy fabrics.

Shirts Programme

A pre-set 60 degree cycle programme for drying shirts and other synthetic fabrics. By simply selecting the fabric type, the machine will automatically determine the optimum drying temperature. Drying time can also be shortened according to individual requirements.

Rapid Programme

A 40 degree cycle programme for drying towels and other heavy fabrics.

Mix and Dry Programme

The mix and dry programme is perfect for drying a mix of fabrics.

Sensor Dry

The sensor dry programme is perfect for drying a mix of fabrics. It features a sensor that detects the moisture level in the laundry and automatically adjusts the drying time. The sensor dry programme is perfect for drying a mix of fabrics. It features a sensor that detects the moisture level in the laundry and automatically adjusts the drying time. The sensor dry programme is perfect for drying a mix of fabrics. It features a sensor that detects the moisture level in the laundry and automatically adjusts the drying time.

'B' Energy

Noval has introduced a range of 'B' energy, which is our highest energy rating available.

Timed Drying Cycles

The timed drying cycles are perfect for drying a mix of fabrics.

Fast Iron/Anti-Crease Cycle

The fast iron/anti-crease cycle is perfect for drying a mix of fabrics. It features a sensor that detects the moisture level in the laundry and automatically adjusts the drying time. The fast iron/anti-crease cycle is perfect for drying a mix of fabrics. It features a sensor that detects the moisture level in the laundry and automatically adjusts the drying time.

Refresh Cycle

Tumbling of laundry in cool air to freshen up clothes.

Delicate Wool Finish Cycle

The delicate wool finish cycle is perfect for drying a mix of fabrics. It features a sensor that detects the moisture level in the laundry and automatically adjusts the drying time. The delicate wool finish cycle is perfect for drying a mix of fabrics. It features a sensor that detects the moisture level in the laundry and automatically adjusts the drying time.

Highly Efficient Reverse Action

The highly efficient reverse action cycle is perfect for drying a mix of fabrics. It features a sensor that detects the moisture level in the laundry and automatically adjusts the drying time. The highly efficient reverse action cycle is perfect for drying a mix of fabrics. It features a sensor that detects the moisture level in the laundry and automatically adjusts the drying time.

'Filter Care' Indicator

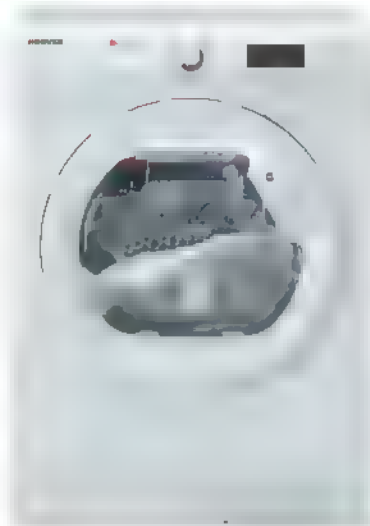

The 'filter care' indicator is perfect for drying a mix of fabrics. It features a sensor that detects the moisture level in the laundry and automatically adjusts the drying time. The 'filter care' indicator is perfect for drying a mix of fabrics. It features a sensor that detects the moisture level in the laundry and automatically adjusts the drying time.

15 PLACE SETTINGS

15 Place Settings

The largest capacity dishwasher in the market, the 15 place setting dishwasher.

The lower-rack FlexBasket has a special grid that is adjustable to accommodate the enables larger and non-standard shaped plates to be loaded quickly and easily. The versatile basket can not only hold glasses, 7 place settings but also accommodate large pots and pans easily.

3D Dynamic

Offering increased 3D place setting space, the new 3D Dynamic 3D dishwashers offer maximum performance and unbeatable convenience to consumers. Due to its unique design, the 3D Dynamic has space for 25% more items than a traditional 12 place dishwasher.

13 Litres Water Consumption

Using just 13 litres of water to wash 15 place settings, the 13 litre filtered water consumption 7000 class is among the best in performance.

LED Phase Indicator

The special LED Phase Indicator of the new 15 place setting dishwasher can help you know the phase of the wash cycle.

Delay Start

The delay start function can be set to start the wash cycle at a later time, allowing you to take advantage of cheaper-rate electricity tariffs.

Easy Adjust Basket

The height of the upper basket can be adjusted easily to allow larger plates to be stored in it.

Super Eco Button

This option enables a further 25% reduction in energy consumption, making it the most eco-friendly dishwasher in the market.

5 in 1 Button

Selecting the 5 in 1 button enables the dishwasher to wash 4 in 1 or 5 in 1 tablets.

Hygiene+ Cycle

The Hygiene+ Cycle is a special wash cycle that is designed to kill 99.9% of the bacteria in the wash and rinse phases.

Safe Stop Baskets

The Safe Stop Baskets are designed to prevent the dishwasher from starting if the basket is full of crockery.

29min Rapid Wash

Rapid 29 minute wash for those slightly dirty items.

FRIDGE FREZZANO

Today we need to store fresh and frozen food in the optimum condition – it's more important than ever. With increasing focus on healthy eating and 5-a-day fruit and veg consumption, we have redesigned our fridge-freezer to reflect the storage requirements of today's consumer.

Hoover fridge-freezers are packed with innovative, high technology features designed to give you maximum flexibility of your storage space and to make life a whole lot easier.

Frost Free

The Hoover frost-free system eliminates the hassle of defrosting your interior so there's no need for defrosting.

Stay Fresh Zone

The dedicated temperature controlled zone, adjustable to between 0°C and 8°C, is designed to keep fresh and life foods for longer. It's also the ideal temperature for cooked/chilled foods.

XL Bottle Storage

The extra large bottle storage for those bottles you really don't want to lose.

XL Fruit & Veg Storage

The extra large XL fruit and vegetable drawer with spray function and easy slide action. This dedicated humidity controlled zone is perfect for storing all kinds of produce and keeping it at its peak.

Glass Shelves with Chrome Highlights

Spill resistant glass shelves with metal edges prevent spill damage, minimising the risk of slip and fall accidents. The chrome highlights give an added style statement.

A Energy Efficiency

The Hoover Energy Star label means Hoover fridge-freezers are energy efficient and will save money on your electricity bill.

Door Depth

The Hoover fridge-freezer is designed to fit into a standard 60cm door depth, so you can choose the perfect Hoover for your kitchen.

FRIDGE FRIGIDA

Versatile Door Storage with Chrome Highlights

Freeze, chill, refrigerate. It's all 24/7s built into period for living convenience. Egg-shaped door panels with chrome highlights that add a modern style and quality.

Easy Clean Removable Door Seal

It's not a cleaning job. It's a breeze. As easy as possible, it's incorporated in removable door seal which allows you to remove it and wash it thoroughly rather than wiping it over.

Transparent Freezer Drawers

Freezer drawers are now clear. It's a new look. It's a new way to see your frozen food. Designed with transparent acrylic drawers that are mounted on tracks. This also prevents frost buildup when the freezer drawer opening.

Dairy Compartment

Special Dairy Management Compartment. Dairy compartment with a built-in compartment and cooling compartment for fresh and frozen dairy.

Designer Internal Aesthetics

As well as being versatile and convenient, Frigida Refrigerator is a modern style with polished stainless steel accents highlights in the door design and interior door panels.

GUARANTEE

Guarantee

All Hoover products are covered by a full call out, parts & labour guarantee for 12 months from the date of purchase.

As an additional service to all of our customers, Hoover also offers a **FREE 5 year parts guarantee** when you register your appliance, giving you additional protection.

To get the most out of your product and to register for your 5 year free parts guarantee **please call 08444 810290** or complete our online registration form at **www.hoover.co.uk**.

Opening hours: Mon-Sun 8am-8pm.

www.hoover.co.uk

Extended Warranty

Hoover offers you the opportunity to extend the warranty of your appliance* for a further four years, giving you the peace of mind that comes from a nationwide network of genuine Hoover engineers.

The Hoover Service Plan gives you:

- Total protection for your electrical household appliance.
- Peace of mind against call out and labour bills.
- A brand new replacement if your appliance can not be repaired.
- Repairs by a nationwide network of genuine Hoover engineers.
- No limit to the number of claims.
- Renewable protection, normally for the life of your appliance.

For further details or to register your product **please call 08444 810177**.

Opening hours: Mon-Fri 8am-8pm.
Sat-Sun 10am-4pm.

*The appliance registration and extended warranties offered by Hoover are managed in partnership with Domestic and General (the leading specialist provider of breakdown protection in the UK).

After Sales Service

Service support of your Hoover product is important to us and that is why we employ our own nationwide network of dedicated Hoover engineers.

For detailed after sales support, please visit the after sales service section of www.hoover.co.uk which enables you to:

- Book a service call
- Use our problem solving guide
- Find out handy hints & tips
- Register your guarantee
- Enquire about spare parts & accessories
- Download instruction manuals

Contacts

To contact After Sales Service **please call 08444 995599**.

Mon-Fri 8.30am-6pm, Sat 9am-5pm, Sun 10am-4pm.

To ensure the best performance from your dishwasher you need top performing detergents, which is why HOOVER has tested and recommends Finish.
